

# Carton Erector

The carton erector is designed to automatically unfold pelagic fish cartons. It is a good solution if it is not practical to have gluing machines placed in a separate room above the factory.

## SPECIFICATIONS:

- Cartons: Adjustable for 580-620 x 380-420 mm.
- Storage: Approx. 120 cartons.
- Material: Stainless steel.
- Control system: PLC.
- Press air: 6-7 bar.
- Capacity: 16 cartons per minute.

## INCLUDES:

- Processing and filleting lines for cod, pollack and other major species of whitefish.
- Slaughtering and filleting lines for salmon.
- Live-fish handling on board well boats.
- Receiving plants and filleting lines for pelagic fish; weighing- and packing lines.
- Shellfish processing lines.
- Refrigeration.
- Icehandling systems.
- Automatic platefreezers.
- Vacuum pumping systems.
- Thawing systems.
- RSW plants.
- Belt Freezers (IQF)
- Freezing tunnels.
- Stacking and palleting.
